

## ■ Features

- Slim width and low profile(20mm)
- · Fanless design for noise free environment
- Withstand 300VAC surge input for 5 seconds
- · DC OK active signal function
- · Semi-Potting for high moisture environment
- Protections: Short circuit / Over load / Over voltage / Over temperature
- Current sharing for redundant function(5V/4.2V/3.3V only)
- Max. operating wattage to 200W at 230V AC input
- Operating altitude up to 5000 meter (Note.5)
- LED indicator for power on
- · 3 years warranty

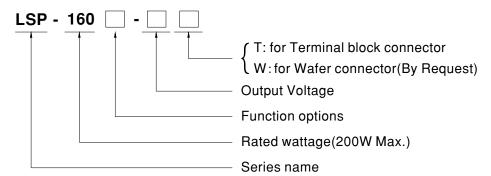

# Applications

- Industrial automation machinery
- Industrial control system
- Mechanical and electrical equipment
- Electronic instruments, equipments or apparatus
- Household appliances
- LED display application

## Description

LSP-160 series is a 200W Max. single-output slim type power supply with 20mm of low profile design. Adopting the full range 100~264VAC input, the entire series provides an output voltage line of 3.3V,4.2V,5V, 12V, 24V, 36V and 48V. In addition to the high efficiency up to 93.5%, that the whole series operates from -30°C ~ 70°C under air convection without fan. LSP-160 has the complete protection functions and 5G anti-vibration capability; It is complied with the international safety regulations such as TUV BS EN/EN62368, UL62368 and GB4943. LSP-160 series serves as a high performance power supply solution for various industrial applications.

# Model Encoding

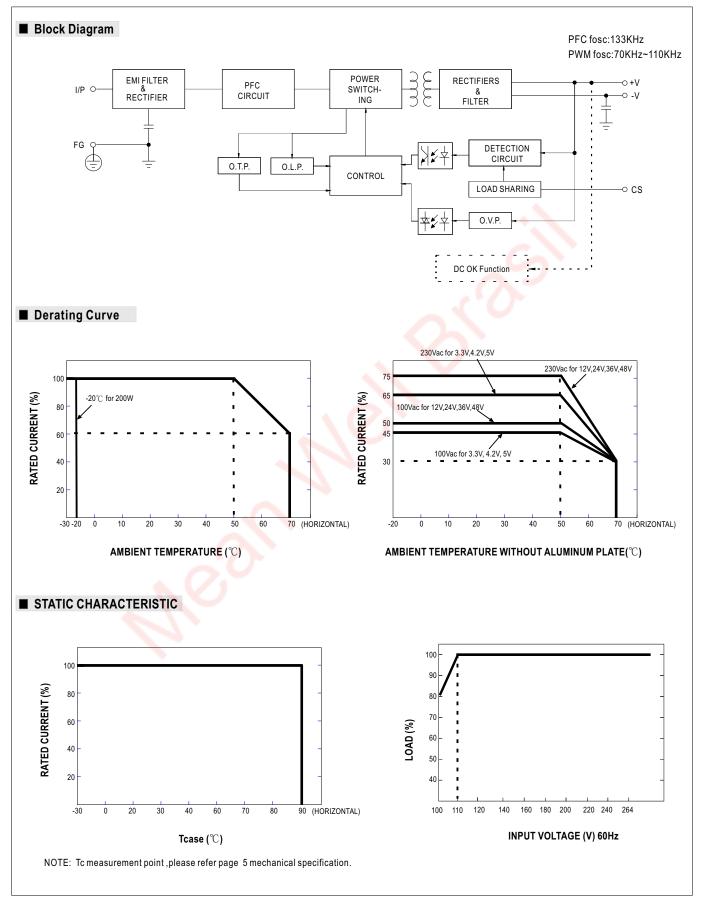

| Туре  | Function   | Note     |
|-------|--|----------|
| Blank | Enclosed(DC voltage output)& Built-in DC OK active signal.             | In Stock |
| R     | Built-in DC OK active signal and current sharing function(3.3/4.2/5V). | In Stock |

| NOTE            | <ol> <li>All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.</li> <li>Ripple &amp; noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf &amp; 47uf parallel capacitor.</li> <li>Tolerance: includes set up tolerance, line regulation and load regulation.</li> <li>Derating may be needed under low input voltages. Please check the derating curve for more details.</li> <li>The ambient temperature derating of 5°C/1000m is needed for operating altitude greater than 2000m(6500ft)</li> <li>The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)</li> <li>The maximum operate wattage up to 200W at 200~264VAC input and -20~50°C ambient temperature with aluminum plate, MEANWELL can guarantee the lifetime and offer 3 years warranty.</li> </ol> |  |                      |                      |                     |                    |                      |                 |  |

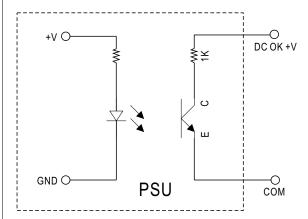

## ■ Function Manual

#### 1.DC\_OK Signal

 $DC\_OK \ is \ a \ collector \ shorted \ signal. \ It \ is \ used \ by \ an \ optocoupler \ in \ the \ power \ supply \ which \ indicates \ the \ output \ status \ of \ the \ power \ supply \ as \ exhibited \ below.$ 

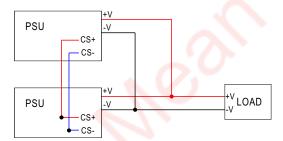

| Optocoupler C-E Pin Conduction | PSU turns on  | DC ok         |
|--------------------------------|---------------|---------------|
| Optocoupler C-E Pin Open       | PSU turns off | DC fail       |
| Optocoupler Rating(max.)       | 15Vdc/10mA re | esistive load |

| Power Status         | DC_OK signal |
|----------------------|--------------|
| Normal               | Low          |
| Short circuit/OLP    | Hiccup       |
| OVP/OTP/Breakingdown | High         |

#### 2.Redundant function:

LSP-160 has built-in redundant function and can be connected 2 units in parallel for current sharing.

- \* Difference of output voltages among parallel units should be less than 0.2V(Can Fine tune by SVR1).
- \* When in parallel operation the maximum load should not be greater than the rated power.
- \*\* When output current<(30% rate current) × (Number of unit), the current shared among units may not be fully balanced.</p>
  And the LED indicator maybe flash of one of them, but not effecting normal working.

© CS+/CS- on CN1 are connected mutually in parallel (Note: CS+/CS- do not reverse connection).

## ■ Installation

#### 1. Operate with additional aluminum plate

In order to meet the "Derating Curve" and the "Static Characteristics", LSP-160 series must be installed onto an aluminum plate (or the cabinet of the same size) on the bottom. The size of the suggested aluminum plate is shown as below. And for optimizing thermal performance, the aluminum plate must have an even and smooth surface (or coated with thermal grease), and LSP-160 series must be firmly mounted at the center of the aluminum plate.

unit:mm
